Experience

Cloudzy.com

Nov, 2024 – Present

Full-Stack Software Developer

VPS Provider since 2008. in/co/cloudzyvps

Status Page

- Designed a multi-tenant architecture allowing tenants to define groups and services, with subscription options to expose services externally
- Supported multiple protocols and conditional checks for service monitoring and grouping
- Built active-active, masterless multi-region replication with auto-provisioning
- Built Cloudflare Workers for routing, load balancing, and status pages

Billing System

- Improved backend reliability through refactoring and architecture cleanup
- Designed a legacy replacement with GDPR and IFRS compliance

Mailserver

- Built and operated a scalable multi-region email platform; added Grafana-based observability for latency, bounces, and throughput
- Automated RFC 5965 abuse handling

Main Website

- Unified multiple legacy sites into one application
- Built custom WordPress plugins and Elementor widgets; consolidated dozens of plugins into one solution
- Implemented “sunrise” logic with an Elementor child theme and snippets for staging/production proxy rules, scaling, load balancing, and access control
- Automated SEO tests using Google Apps Script, and CI/CD for multi-regional replication; implemented tiny self-hosted comment spam detection system, and single-binary optimizer to improve static files at the edge

General tasks

- Reverse-engineered Cloudflare rules; implemented multiple MVPs for a shared-hosting platform; Billing as a Service; Applicant Tracking System; Core Web Vitals monitoring; Live Chat + AI; Marketing Automation Platform; Developer CLI

Arg Group (Gordarg.com) & Previous Experiences

2018 – 2024

Founder & Software Engineer

Design and development of custom-built software solutions for business. gordarg.com

- Founded the company and led a team of 3–5 engineers serving 50^{+} clients.
- Gordarg.com oversees subsidiaries such as data aggregation service and some mobile applications, all of which are accessible through our website.
- Highlighted below are some of the key projects where personal contributions were particularly significant and were recognized through numerous recommendation letters from satisfied customers.
- **Back-end Developer at Mr Bilit Group** — As a remote developer, worked on a legacy PHP codebase and helped transition it into a more scalable C# solution, contributing to the system that synchronized hundreds of thousands of bus and plane seat statuses for reservation platforms.
- **CTO at Tokan Tav Tejarat (Hamtire)** — Responsible for automating data-gathering processes and contributing to the development of solutions for importing heavy-vehicle tires, while helping guide the team toward delivering these systems to market.
- **Site Reliability Engineer at Zoomila.com** — Broke a large legacy codebase into several maintainable containers, removing a major bottleneck that had been slowing down the project’s refactoring efforts, and helped make the transition to a cleaner, more modular architecture possible.
